GENERAL
The CentraLine LonWorks Bus I/O Modules communicate via the LonWorks Bus. These pluggable CentraLine LonWorks Bus I/O modules consist of a terminal socket and a removable electronic module, allowing the socket to be mounted and wired before the electronic module is installed. All such electronic modules can be swapped out without disrupting the power and bus connections: Simply unplug the "old" and insert the "new" module.

WARNING
Risk of electric shock or equipment damage!
► Do not touch any live parts in the cabinet.
► Disconnect the power supply before you start to install the control system. More than one disconnect switch may be required to de-energize the system.
► Do not reconnect the power supply until you have completed the installation.
► Unused terminals must be closed (by completely screwing in the terminal screws), thus preventing the accidental touching of "live" parts.

Software updates, configuration, and commissioning are all done automatically by the controller for all LonWorks Bus I/O Modules. The LonWorks Bus I/O Modules may be used with any CPU supporting LonWorks Bus communication (e.g., the LION, EAGLE, etc.).

FEATURES
- Plug-and-play functionality for easy maintenance.
- Pluggable LonWorks Bus I/O modules can be exchanged without rewiring. Further, the separate installation of terminal sockets and electronic modules lower risk of damage and theft in the construction phase.
- Fast wiring with state-of-the-art push-in terminals (screw-type terminals also available) and bridge connectors.
- Wide range of sensors supported (NTC20kΩ, NTC10kΩ, PT1000-1/-2, Johnson A99 PTC, NI1000TK5000, PT3000, Balco500, 0/2…10 V, 0/4…20 mA).
- Binary input LEDs of the CentraLine LonWorks Bus I/O Modules can be configured for status display (off / yellow) or alarm display (green / red) per channel.
- Configurable safety position for outputs, in case of loss of communication with the controller.
- Max. wiring flexibility due to optional accessories like auxiliary terminals and cross-connectors.
- Can be mounted in small installation housings
- Flexible mix of LonWorks Bus I/O modules covering all your application requirements.

**NOTE:** The inputs and outputs of all CentraLine analog and binary I/O modules are protected against short circuit, 24 VAC +20%, and 40 VDC.
In the case of the relay outputs of other CentraLine I/O modules (i.e., relay output modules, floating output modules, and mixed I/O modules), appropriate fusing must be provided to ensure that permissible load currents are not exceeded. See also sub-section “Features” in section “Relay Output Modules” on pg. 14.

**Characteristics**

- **Linear Graph, 0...10 VDC with pull-up, 0(2)...10 VDC without pull-up**
- **NTC20kΩ (-50...+150 °C, default)**
- **PT1000-1 (-50... +150 °C)**
- **PT1000-2 (0...400 °C)**
- **Johnson A99 PTC (-40...+120 °C)**
- **NI1000TK5000 (-30...+130 °C)**
- **PT1000 (-50...+150 °C)**
- **BALCO500 (-30...120 °C)**
- **Also configurable as:**
  - Binary inputs
  - Linear graph (0...10 V with pull-up)

**Features:**

- 16-bit resolution
- Configurable offset per input
- Auxiliary voltage: 10 VDC, I<sub>max</sub> = 5 mA
  - 0...11 VDC / ± 1 mA
  - Also configurable as: floating outputs or binary outputs (0 V / 10 V)

**Version with manual override (R):**

- 1 potentiometer per output
- Auto feedback signal (mode + value)
- Blinking in manual override position

**Version with manual override (R):**

- 1 switch per output
- Auto feedback signal (mode + value)
- Blinking in manual override position

---

**Manual Overrides as per EN ISO 16484-2:2004**

The manual override switches and potentiometers of the output modules support direct operation as per EN ISO 16484-2:2004, section 5.4.3 "Local Priority Override/Indicating Units."

Specifically, the positions of the manual override switches and potentiometers directly control the outputs – independently of the controller and HMI. When a manual override switch or potentiometer is not in its default position ("auto"), the corresponding output LED will blink continuously, and the output module will send a feedback signal with the status "manual override" and the given override position to the controller (which will then also store this information in its alarm memory).

**NOTE:** When updating the firmware of output modules, their outputs are turned OFF – regardless of the position of their manual override switches and/or potentiometers.
GENERAL FEATURES

In addition to the main microprocessor, the LonWorks Bus I/O Modules also have their own Neuron chip (3120).

System Constraints

2 Cable (power, LonWorks) connection from controller to LonWorks Bus I/O Modules
3 Swivel label holder
4 Cable connection between LonWorks Bus I/O Modules on separate DIN rails
5 Bridge connectors between LonWorks Bus I/O Modules on same DIN rail
6 Stopper (from 3rd-party supplier)
7 Auxiliary terminal packages

LEDs
Each CentralLine LonWorks Bus I/O Module is equipped with:
- one green power LED
- one yellow service LED

Overvoltage Protection
The inputs and outputs of all CentralLine analog and binary I/O modules are protected against short circuit, 24 VAC +20%, and 40 VDC.
In the case of the relay outputs of other CentralLine I/O modules (i.e., relay output modules, floating output modules, and mixed I/O modules), appropriate fusing must be provided to ensure that permissible load currents are not exceeded. See also sub-section "Features" in section "Relay Output Modules" on pg. 14.

Service LED
Each LonWorks Bus I/O Module is equipped with a yellow service LED (status: yellow/OFF) for easy diagnosis of failures.

LonWorks Service Button
Each LonWorks Bus I/O Module is equipped with a LonWorks service button.

Microprocessors
Each LonWorks I/O Module is equipped with an FTT-10A transceiver (link power-compatible) and can thus be used with any LonWorks controller.
Analog Input Module

Fig. 6. Analog input impedance setpoint (input circuit for NTC10kΩ, NTC20kΩ, wall module setpoint)

Fig. 7. CentraLine LonWorks Bus Analog Input Module (schematic)

Features
- 0…10 VDC, 2…10 VDC without pull-up
- 0…10 VDC with pull-up (linear graph, e.g., used for wall module connection)
- 0/4…20 mA, needs 499 Ω resistor in parallel
- NTC20kΩ (-50…+150 °C, default)
- NTC10kΩ (-30…+100 °C)
- PT1000-1 (-50…+150 °C)
- PT1000-2 (0…+400 °C)
- NI1000TK5000 (-30…+130 °C)
- PT3000 (-50…+150 °C)
- BALCO500 (-30…+120 °C)
- Binary input
- 16-bit resolution
- Configurable offset per input
- Auxiliary voltage: 10 VDC, I_{MAX} = 5 mA
- Sensor failure detection

NOTE: The hex switch S2 (located next to the LONWORKS service S1) has no function in combination with a LONWORKS Bus I/O module. It is used with Panel Bus I/O modules, only.

The CentraLine LONWORKS Bus Analog Output Modules, with 8 analog outputs, are available in the following models:
- CLIOL822A LONWORKS Bus Analog Output Module (without manual overrides)
- CLIOLR822A LONWORKS Bus Analog Output Module (with manual overrides)

They are installed with the XS821-22 or XSU821-22 Terminal Socket.

Fig. 10. CLIOPR822A LonWorks Bus AO Module (shown with terminal socket)

Fig. 11. CentraLine LONWORKS Bus Analog Output Modules (schematic)

Features
- 0…11 VDC, +/-1 mA
- Floating actuator (requires MCD3)
- Binary output (0 V / 10 V)
- red LED per output (brightness according to signal level)
- Optional versions with manual override potentiometers (Auto, 0…100%; LED flashes in override mode)
- Feedback on manual override signal
- 8-bit resolution
- Configurable safety position for outputs in case of communication problems (remain, 0%, 50%, 100%)
CLIOL822A ANALOG OUTPUT MODULE

Fig. 12. CLIOL822A LonWorks Bus AO Module, wiring example 1: Actuator
The relay module facilitates the control of peripheral devices with high load via the analog outputs.

- Input terminal 17 of MCD3 controls changeover contact K3.
- Relay terminal 18 of MCD3 controls the N.O. contacts (floating outputs) K1, K2.
Fig. 14. CLIOL822A Lonworks Bus AO Module, wiring example 3: Relay Module MCE 3

- The relay module facilitates the control of peripheral devices with high load via the analog outputs.
- Input terminal 16 of MCE3 controls the N.O. contact K3.
- Input terminal 17 of MCE3 controls the changeover contact K2.
- Input terminal 18 of MCE3 controls the changeover contact K1.
Binary Input Module

3. Service LED
4. Power LED

**NOTE:** The hex switch S2 (located next to the LonWorks service S1) has no function in combination with a LonWorks Bus I/O module. It is used with Panel Bus I/O modules, only.

The CentraLine LonWorks Bus Binary Input Module, with 12 binary inputs, is installed with the XS823 or XSU823 Terminal Socket.

**Configuration as Fast Totalizer**
Using CARE / COACH AX / COACH NX, the binary inputs can be configured as fast totalizers for operation in conjunction with devices equipped with an open collector output.

**Table 5. Binary inputs used as fast totalizers**

<table>
<thead>
<tr>
<th>Frequency</th>
<th>Pulse ON</th>
<th>Pulse OFF</th>
<th>Bounce</th>
</tr>
</thead>
<tbody>
<tr>
<td>max. 20 Hz</td>
<td>min. 25 ms</td>
<td>min. 25 ms</td>
<td>max. 5 ms</td>
</tr>
</tbody>
</table>

**Features**
- Static binary input (dry contact)
- Totalizer for up to 20 Hz
- LEDs per binary input supporting alarm display mode (red/green) or status mode (off/yellow).
- Color mode of each LED can be set to OFF/yellow or green/red in CARE / COACH AX / COACH.
Fig. 18. CLIOL823A LonWorks Bus BI Module, wiring example: Dry contact and totalizer

Legend
1 LonWorks service button S1
2 Manual overrides
3 Status LEDs
4 Service LED
5 Power LED

Fig. 20. CentraLine LonWorks Bus Relay Output Modules (schematic)

Features
- Cross-Connector
- 1 yellow LED per output
- Optional versions with manual override switches (Auto, 0, 1; LED flashes in override mode)
- Feedback on manual override signal
- Configurable safety position for outputs in case of communications problems (remain, OFF, ON)
- Permissible load per Relay Output Module (total)
  • Max. load (fuse F3): 19…250 VAC: 12 A
    1…29 VDC: 12 A resistive, 3 A inductive
  - Permissible load per normally-open contact:
    • Max. load: 19…250 VAC: 4 A resistive or inductive
      1…29 VDC: 4 A resistive, 1 A inductive
    • Min. load: P > 50 mW
  - Permissible load per normally-closed contact:
    • Max. load: 19…250 VAC: 2 A resistive, 1 A inductive
      1…29 VDC: 4 A resistive, 1 A inductive
    • Min. load: P > 50 mW

The CentraLine LonWorks Bus Relay Output Modules, with 6 relay outputs, are available in the following versions:
• CLIOP824A LonWorks Bus Relay Output Module (without manual overrides)
• CLIOPR824A LonWorks Bus Relay Output Module (with manual overrides)
They are installed with the XS824-25 or XSU824-25 Terminal Socket.

- **THICK LINES** = MIN. 1.5 mm² - or less, as per F3
- **DASHED LINES** = SELECTED INTERNAL CONNECTIONS
Fig. 22. CLIOL824A LonWorks Bus RO Module, wiring example 2: Relay blocks with low and line voltage
Approvals, Certifications, and Standards

Approvals and Certifications
- CE-approved
- Conforms to EN 60730-1 and EN 60730-2-9
- Investigated according to United States Standard UL916 (USL-listed) as well as according to Canadian National Standard(s) C22.2 (CNL-listed)

Classification according to EN60730-1
Environmental conditions: For use in home (residential, commercial, and light-industrial) environments
Pollution degree: Class 2
Protection against shock: Class II
Software class: Class A
Overvoltage category: II

Classification according to EN60529
(Degree of Protection Provided by Enclosures)
Classification: IP20

Ambient Environmental Limits
Operating temperature: 0 ... +50 °C at 5...93% r.H.
Storage temperature: -20 ... +70 °C at 5...93% r.H.
Humidity: 5 ... 93% r.h. non-condensing

Current Requirement and Heat Dissipation
The LonWorks Bus I/O Modules are equipped with highly-efficient switching power supplies which provide for relatively uniform power consumption over a wide range of supply voltages (see Table 6). The specific heat dissipation inside the modules amounts to less than 2 W for all models.

Mechanical

Housing Dimensions (H x W x D)
The LonWorks Bus I/O Modules (mounted on Terminal Sockets) all have the dimensions: 110 X 90 X 93 mm (see also Fig. 23 on page 18).

Housing Material
Plastic, flame-retardant

Mounting Methods
DIN-rail mounting (e.g., in control cabinet).

Calculated Lifetime of Weakest Components
MTBF ≥ 13.7 years (under typical operating conditions)
Dimensions
